

THE FUTURE'S BRIGHT

Apprentice Cable Jointer (Powerline) Certificate III – ESI Cable Jointing

Background

The Cable Jointing Apprenticeship will be conducted over a four-year period incorporating both formal training (attendance at TAFE) and "in field" (on the job) segments.

An Apprentice Cable Jointer (Powerline) will see you install and maintain cables located in underground pipes and trenches and also terminate cables on electrical equipment and overhead lines that are an integral part of our electricity distribution network.

During your apprenticeship you will learn the highly specialised skills needed for joining electrical power cables. You will work on both low and high voltage power cables and learn a variety of jointing and terminating techniques for underground electrical cables. Other tasks may involve:

- Repairs and maintenance of cables
- Installing new underground cables
- Jointing and termination of cables in substations
- Emergency work
- Test and locate cable faults

Salary Range

- 1st Year salary: \$545 per week (as at September 2010)
- 4th Year salary: \$818 per week (as at September 2010)

Post Training

- Diploma in ESI Power Systems
- Dual Trade Ticket (for example Electrical Fitter and Lineworker)
- High Voltage Operating Ticket
- Switching Operations
- Deakin Management Training

Career Opportunities with CitiPower and Powercor

- High Voltage Glove and Barrier Linesman
